“Graham, how have you implemented DoodleMaths in your school?”

“Our school ethos is ‘learning should be captivating, exciting and enjoyable’ and the strategy we’ve implemented is absolutely underpinned by this. DoodleMaths was one part of a holistic, all-encompassing plan; we embedded stimulating provision across the school to ensure each pupil’s needs are well catered for. We have seen big improvements in maths attainment across the board over the last 18 months, and DoodleMaths has played a significant part in this. School leaders have been praised for driving positive change across the school and into the wider family.”

How has DoodleMaths had an impact on attainment in your school?

“With the new Year 4 multiplication check in 2020, DoodleMaths has been invaluable in helping our children to learn and cement their skills with the multiplication tables. The ever-changing challenges and rewards in the app mean that children are fully engaged and, through this engagement, are becoming much more confident mathematicians. This is showing through in the teacher assessment and backed up by the data for each child generated by the app.”

“What does the Lanesend community think of DoodleMaths?”

“As a school, Lanesend bought DoodleMaths as a homework solution. The teachers love DoodleMaths’ flexibility. We have fourteen classes. Teachers use it in a variety of ways during the school day: as a content tool for supporting maths lessons and as a powerful intervention tool. Parents are incredibly positive, seeing it as a safe environment in which children can answer targeted maths questions without judgement. Children are highly engaged in earning stars and positively endorsing their classmates’ efforts through the in-app messaging tools.”

How would you sum up the value of DoodleMaths to the school?

“In short, DoodleMaths is the perfect app for schools to help boost maths attainment whilst promoting a real love of the subject.”
